EXPERIENCE

Tekton Construction Technologies

Full Stack Software Engineer | Sabio · May 2022 to Current

- Developed clean, readable code following common practices and development design patterns.
- Implemented RESTful API to develop services and controllers in ASP.NET in order to pass data to our View in React.js, utilizing JavaScript, Bootstrap, CSS, and basic HTML5.
- Utilized ASP.NET MVC to build models in C#, designing model routing, model validation, and dependency injection to validate data.
- Utilized resources such as Postman, Google, Github wiki, and various coding platforms to troubleshoot, debug, test and verify code functionality.
- Incorporated client-side and server-side validation functionality via the .NET stack.
- Designed and maintained relational databases, stored procedures and user defined tables using MS SQL Server Management Studio, while managing database resources to ensure satisfaction of unique data requirements and preventing duplicate data.
- Responsible for building API endpoints with ASP.NET core to allow clients to read and write to the database.
- Interacted with my development team during the Software Development Life Cycle through peer planning sessions, code reviews, virtual pair programming, Sr Dev-Jr Dev interactions, and peer-peer testing.
- Built application and ensured code quality and continuity with a team in an AGILE environment, regularly using source-control (Git and GitHub), and participated in daily scrum meetings, peer code reviews and team code talks.

HealthTrust Workforce Solutions

Lead Certified Pharmacy Technician · Apr. 2015 to Oct. 2022

- Worked with SMART application and Infor Warehouse Management System application.
- Managed the day-to-day activities and workload of the Implant Department.
- Maintained inbound and outbound logs and spreadsheets of implants.
- Supervised the Pharmacy Department team and trained new-hires.
- Created training manuals, best practices, policies and instruction guides for the team to adhere to.
- Troubleshoot and brainstormed solutions for inventory discrepancies
